ECONOMIC INFORMATION - Quarter 3, FY 2013

The information in this section was prepared by the Massachusetts State Data Center (MassSDC) at the University of Massachusetts Donahue Institute and may be relevant in evaluating the economic and financial condition and prospects of the Commonwealth of Massachusetts. The State Data Center archives data about Massachusetts. The demographic information and statistical data, which have been obtained by the MassSDC from the sources indicated, do not necessarily present all factors that may have a bearing on the Commonwealth's fiscal and economic affairs.

All information is presented on a calendar-year basis unless otherwise indicated. **The section was prepared for release on April 26, 2013. Information in the text, tables, charts, and graphs is current as of April 1, 2013.** Sources of information are indicated in the text or immediately following the charts and tables, and also from the *Sources* on the last page of the Exhibit A section. Although the Commonwealth considers the sources to be reliable, it makes no independent verification of the information presented herein and therefore does not warrant its accuracy.

Population (p. A-2)	Massachusetts	United State
Estimated Percent Change in Population, July 1, 2010 - July 1, 2012	1.4%	1.59
Personal Income, Consumer Prices, and Poverty (p. A-8)		
Per Capita Personal Income, 2012	\$54,687	\$42,69
Average Annual Pay, All Industries, 2011	\$59,671	\$48,04
Percent Change in CPI-U*, 2011-2012	1.6%	2.1
Percent Change in CPI-U*, March 2012 - March 2013	1.5%	1.5
Poverty Rate, 2009-2011 Average	10.8%	14.8
Average Weekly Earnings, Manufacturing Production Workers: 2012	\$831.82	\$794.8
Percent Change from previous year	3.1%	1.3
Employment (p. A-18)		
Percent Change in Nonfarm Payroll Employment (Not Seasonally Adjusted),		
March 2012 - March 2013p	1.0%	1.4
Unemployment Rate, 2012	6.7%	8.1
Unemployment Rate, March 2013 (seasonally adjusted)	6.4%	7.6
Education (p. A-24)		
Expenditure Per Pupil K-12 Public, 2010	\$14,350	\$10,61
Percent of Adults with a Bachelor's Degree or higher, 2011	39.1%	28.5
Economic Base and Performance (p. A-30)		
Percent Change in Gross Domestic Product, 2010-2011	2.2%	1.5
Percent Change in International Exports, 2011-2012	-8.0%	4.5
Percent Change in Housing Permits Authorized, 2011-2012	21.7%	9.4

Massachusetts is a densely populated state with a well-educated population, comparatively high income levels, and a relatively diversified economy. While the total population of Massachusetts has remained fairly stable in the last 25 years, significant changes have occurred in the age distribution of the population. Dramatic growth in residents between the ages of 20 and 44 since 1980 is expected to lead to a population distributed more heavily in the 65 and over age group in the next 25 years. Just as the working-age population has increased, income levels in Massachusetts since 1980 have grown significantly more than the national average, and a variety of measures of income show that Massachusetts residents have significantly higher amounts of annual income than the national average. These higher levels of income have been accompanied by a consistently lower poverty rate, and with the exception of the recession of the early 1990s and a

17-month stretch between 2006 and 2007, considerably lower unemployment rates in Massachusetts than in the United States since 1980. The state unemployment rate shrank to 6.4 percent in March 2013 from the previous month, and the state has typically seen a slower rise in unemployment than the nation as a whole. In 2011, Massachusetts was ranked second in the U.S. according to the American Human Development Index, modeled after the United Nations Human Development Index, which compares health, income, and education outcomes.

The following five sections provide detailed information on population characteristics, personal income, employment, human resources, economic base and performance, and infrastructure.

POPULATION CHARACTERISTICS

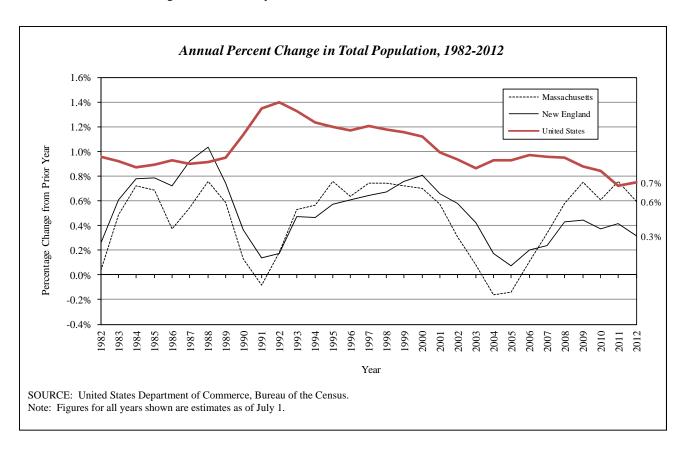

Massachusetts is a relatively slow growing but densely populated state with a comparatively large percentage of its residents living in metropolitan areas. The population density of Massachusetts was estimated as of July 1, 2012 to be 847.7 persons per square mile, as compared to 88.1 for the United States as a whole. Among the 50 states, only Rhode Island and New Jersey have a greater population density. Massachusetts also ranked just behind the same two states in percentage of residents living in metropolitan areas. According to the current county-based definition, 99.6 percent of the state's population live in metropolitan areas.

The state's population is concentrated in its eastern portion. The city of Boston is the largest city in New England, with a July 1, 2012 population estimated at 625,087, or 9.5 percent of the state's population. Boston is the hub of the seven-county Boston-Cambridge-Quincy, MA-NH Metropolitan Statistical Area (MSA), which includes the two southeastern New Hampshire counties, and had a total population as of July 1, 2012 estimated at 4,640,802 or 31.9 percent of the total New England population. The three-county Boston-Quincy, MA Metropolitan division is the largest component of that MSA, with a total population as of July 1, 2012 estimated at 1,926,030.

The second largest MSA in the state is the Worcester, MA MSA, with a July 1, 2012 population estimated at 923,762. The city of Worcester, situated approximately 40 miles west of Boston with a July 1, 2012 estimated population of 181,631, is the second largest city, both in New England and the state. As a major medical and education center, the Worcester area is home to 18 patient care facilities, and 13 colleges and universities, including the University of Massachusetts Medical School.

The third largest MSA in Massachusetts is the three-county Springfield, MA MSA, with a July 1, 2012 population estimated at 625,718. Springfield, the third largest city in the Commonwealth with a July 1, 2012 estimated population of 153,155, is located in the Connecticut River Valley in Western Massachusetts and enjoys a diverse body of corporate employers, the largest of which are Baystate Health System, Big Y Supermarkets, Hartford Hospital, and MassMutual Financial Group. In addition, Springfield is home to three independent colleges.

As the following graph and table indicate, the population in Massachusetts generally grows at a rate similar to the population of New England and more slowly than the nation as a whole. According to the Census Bureau's latest revised estimates released in February 2011, the Massachusetts population has only grown by 4.4 percent since Census 2000, while 15 states have grown more slowly.

The following table compares the population level and percentage change in the population of Massachusetts to the six-state New England region and to the United States.

SOURCE: United States Department of Commerce, Bureau of the Census.

Note: Figures for all years shown are estimates as of July 1.

The next 18 years are expected to bring about a continued change in the age distribution of the Massachusetts population. As the following table and chart show, the share of the 65 and over age group and especially the 85 and over age group will continue to grow. The chart, table, and population pyramids (below, and on the following page) show the projected population by age for Massachusetts for 2000 through 2030. Census has not updated these projections to reflect the 2010 Census.

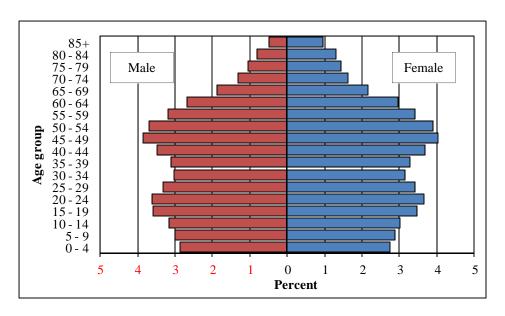

Projected Massachusetts Population by Age Group 2000-2030 (in thousands)									
Year	0-4	5-17	18-24	25-44	45-64	65-84	85+	All Ages	Median Age

Migration. Migration is one of several components of annual population change in Massachusetts. The movement of people from place to place is often linked to economic opportunities or downturns. These data are derived from the filing addresses and number of exemptions submitted with federal tax returns. A tax filer is considered a migrant when he/she files a tax return with an address different from the previous year's filing address. Of the New England states, New Hampshire was the largest net loss for Massachusetts and Rhode Island was the largest net gain for Massachusetts from 2000 through 2010. Massachusetts also sends many more migrants to Florida, North Carolina, California and Georgia than it gains. The chart below illustrates the net migration for Massachusetts to and from the New England states and the rest of the country using IRS data.

Personal Income, Consumer Prices, and Poverty

Personal Income. Real per capita income levels in Massachusetts increased faster than the national average between 1994 and 1997. In 2000, Massachusetts had its highest per capita income growth in 16 years, exceeding the national growth rate by 2.4 percentage points. From 2001 to 2003, real income declined in Massachusetts while staying roughly flat for the nation. However, real income levels in Massachusetts remained well above the national average. In 2006 and 2007, income growth in Massachusetts outpaced the nation. In 2006 and 2007, income in the state grew faster than in the nation, and since 2008, Massachusetts personal income has either declined more slowly, or grown more quickly, than the nation during the recession and its aftermath. In 2009, Massachusetts, New England and the U.S. experienced the biggest decline in over four decades but have increased over the last three years. Only the District of Columbia, and Connecticut have had higher levels of per capita personal income. The following graph illustrates these changes in real per capita personal income in Massachusetts, New England, and the United States since 1970.

The following table compares per capita personal income in Massachusetts, New England, and the United States for the period 1970-2012.

Notes: Using midyear population estimates from the Census Bureau and two CPI-U series from the U.S. Bureau of Labor Statistics for price inflation. p=preliminary

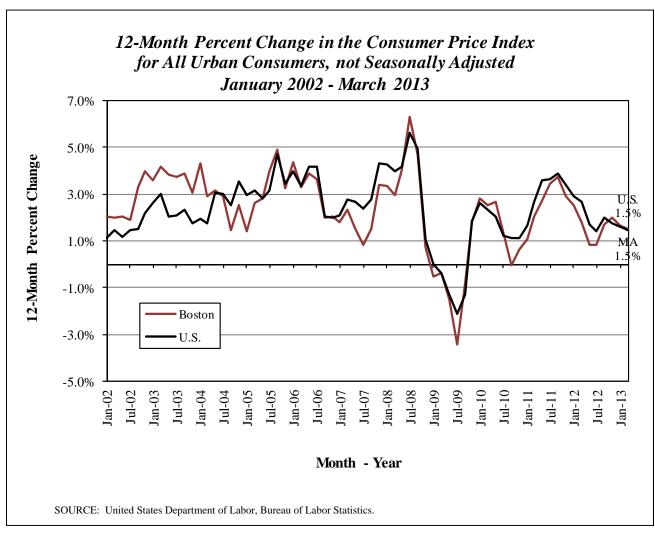

Annual Pay in Nominal Dollars. Massachusetts saw steady growth in average annual pay for most of the past decade, lost ground in 2009, but resumed growth in 2010. Average annual pay is computed by dividing the total annual payroll of employees covered by Unemployment Insurance programs by the average monthly number of employees. Data are reported by employers covered under the Unemployment Insurance programs. Since 2001, average annual wages in the state have grown at an annual rate of 2.8 percent, compared to 2.9 percent for the nation. The level of average annual pay in Massachusetts in 2011 was 24.2 percent higher than the national average: \$59,671 compared to \$48,043.

Wage and Salary Disbursements. Wage and salary disbursements by place of work is a component of personal income and measures monetary disbursements to employees. This includes compensation of corporate officers, commissions, tips, bonuses, and receipts in-kind. Although the data are recorded on a place-of-work basis, they are then adjusted to a place-of-residence basis so that the personal income of the recipients whose place of residence differs from their place of work will be correctly assigned to their state of residence. The table below details Wage and Salary Disbursements since 1990. Between 1998 and 2000, Massachusetts shares of the New England and overall U.S. totals increased. In subsequent years the Massachusetts shares of New England and the U.S. decreased slightly before rising again starting in 2006, reaching 51.1, and 2.9 percent respectively in 2012.

Annual \	Annual Wage and Salary Disbursements, 1990-2012 (in millions of dollars)								
Year	U.S.	N.E.	MA	MA as a pct. of N.E.

Consumer Prices. Higher income levels in Massachusetts relative to the rest of the United States are offset to some extent by the higher cost of living in Massachusetts. The following graph presents consumer price trends for the Boston metropolitan area and the United States for the period between January 2002 and September 2012. The table on the following page shows the annual average of the Consumer Price Index for All Urban Consumers (CPI-U) and the percentage change in that average from the previous year. In 2009 the Boston metropolitan area and U.S. experienced their first monthly year-over-year declines in the CPI-U since 1954 and 1955, respectively. The 2012 U.S. CPI-U has increased 8.5 percent since 2009. Boston's CPI-U only increased 7.3 percent during that period. The latest available data for March 2013 show that the CPI-U for the Boston metropolitan area increased at a rate of 1.5 percent over March 2012, while the U.S. index also increased by 1.5 percent over the same period.

Consumer Confidence, Present Situation, and Future Expectations. These three measures offer multiple insights into consumer attitudes. The U.S. measures are compiled from a national monthly survey of 5,000 households and are published by The Conference Board, Inc. The survey for Massachusetts is conducted in a similar manner and the results are published by the Mass Insight Corporation, based on quarterly polling of 500 adult residents of Massachusetts. The "Present Situation" index measures consumers' appraisal of business and employment conditions at the time of the survey. The "Future Expectations" index focuses on consumers' expectations for six months hence regarding business and employment conditions, as well as expected family income. The overall "Consumer Confidence" index is a weighted average of the two sub-indices. Although the U.S. measures are compiled by a different source than the Massachusetts measures, according to the Federal Reserve Bank of Boston, the numbers are generally comparable. A score of 100 is considered neutral.

According to the Conference Board, consumer confidence nationally reached a six-year high point of 111.9 in July 2007, followed by an all time low of 25.3 in February 2009. The Massachusetts index has been higher than the U.S. index since sharing lows in January 2009, except for a brief period when they tracked closely together in 2011. The Mass Insight Corporation reported that the Massachusetts index stood at 82 in January 2013 (the most recent month available for comparison to the U.S. index), well above the comparable U.S. value of 59.7. The following graph and table detail the recent record of these measures.

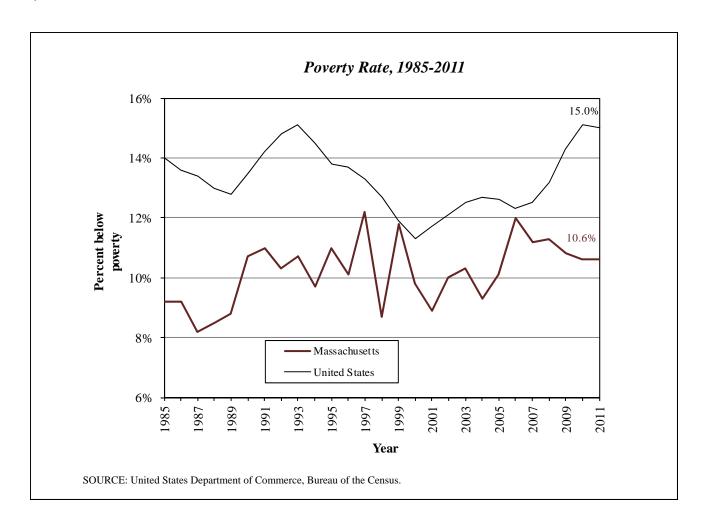

Consumer Confidence, Present Situation, and Future Expectations for Massachusetts and the U.S. January 2002 - January 2013 (1985=100)

SOURCES: The Conference Board, Inc. (for U.S. measures, seasonally adjusted); Mass Insight Corporation (for MA measures, not seasonally adjusted).

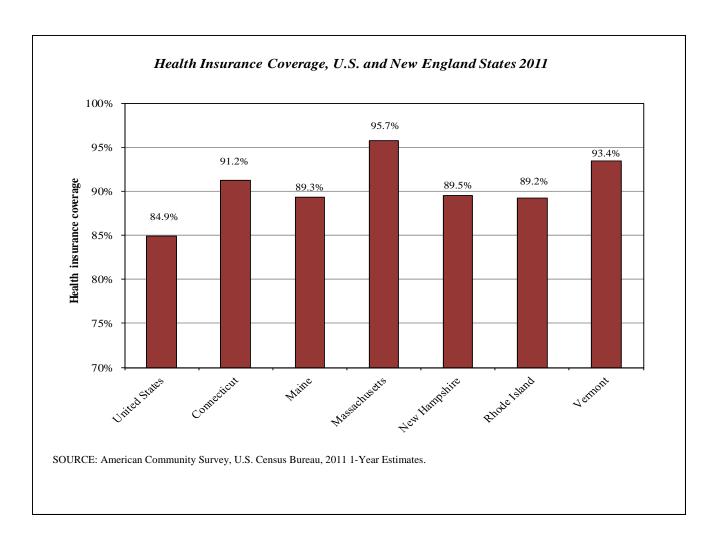

Poverty. Through 2011, the Massachusetts poverty rate remained well below the national average. Since 1980, the percentage of the Massachusetts poverty universe below the poverty line has varied between 7.7 percent and 12.2 percent. During the same time, the national poverty rate varied between 11.3 percent and 15.1 percent. The estimated poverty rate in Massachusetts stayed the same from 2010 at 10.6 percent in 2011, while the poverty rate in the United States decreased slightly from 15.1 percent in 2010 to 15.0 percent in 2011. These official poverty estimates are based on a sample of households and are not adjusted for regional differences in the cost of living. The following chart illustrates the lower poverty rates in Massachusetts (1985 - 2011) compared with the national average during similar periods. Poverty estimates for states are not as reliable as national estimates. Not everyone has a poverty status determined; the poverty universe excludes foster children, college students in dormitories, military personnel in barracks, nursing home residents, and other groups of people in institutionalized settings. Poverty data for 2012 are not yet available.

Transfer Payments. Transfer payment income is payment to individuals from all levels of government and from businesses, for which no current services are performed, including payments to nonprofit institutions serving individuals. These payments accounted for 15.9 percent of total personal income in Massachusetts in 2011, dropping from 16.5 percent in 2010. The chart below does not include transfer payments from business or payments to non-profit organizations. Total transfer payments to individuals in Massachusetts from governments and businesses totaled \$55.9 billion for 2011. Nearly 49 percent of government transfer payments to individuals were medical payments, up from just over 47 percent in 2010.

Health Insurance Coverage. Massachusetts leads the nation in the percent of individuals with health insurance coverage. This is mostly the result of the law passed in 2006 mandating universal coverage in the Commonwealth. In 2011, 95.7 percent of the civilian non-institutionalized population was covered in the state by either public or private insurance, compared with 84.9 percent nationwide. Massachusetts also leads the other New England states in coverage, with Vermont as the next closest at 93.4 percent. All of the New England states have higher rates of coverage than the nation. These data do not indicate the comprehensiveness of coverage, however.

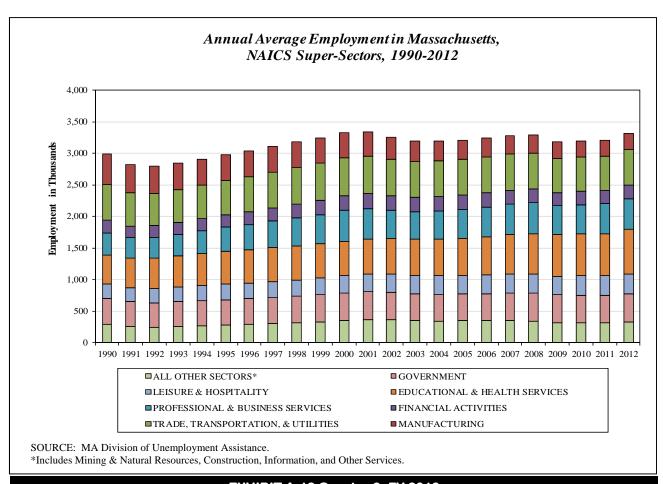

EMPLOYMENT

Employment by Industry. The chart on this page shows the annual level of non-agricultural payroll employment in Massachusetts based on the North American Industry Classification System (NAICS) for the seven largest NAICS supersectors starting with 1990, the earliest year for which NAICS data are available. The chart on the following page compares the super-sector shares for the 2011-2012 period with the corresponding shares for the 1990-1991 period. Like many industrial states, Massachusetts has seen a steady decline of its manufacturing jobs base over the last two decades, not only as a share of total employment, but in absolute numbers of jobs as well. Several NAICS service sectors, Education and Health Services, Professional and Business Services, and Leisure and Hospitality have grown to take the place of manufacturing in driving the Massachusetts economy and now account for almost half of total payroll employment, while Financial Activities, Government, Information, and Trade, Transportation & Utilities have remained relatively level or declined in share.

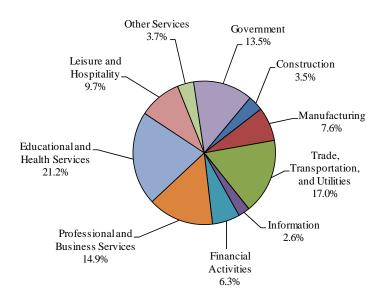

After significant declines in 2002 and 2003, total non-agricultural employment in Massachusetts eventually increased 0.5 percent in 2005 and continued to increase every year through 2008. After a 0.6 percent increase in 2011, employment grew 2.0 percent in 2012, still 2.0 percent below its 2001 peak. The comparable growth rate for the nation in 2012 was up 1.7 percent from 2011 and up 1.4 percent from 2001. The latest seasonally adjusted estimate for the state (3.31 million for March 2013) is about 73 thousand below the peak month in 2001 (3.38 million in February 2001) and about 7.3 thousand less than the last peak in April 2008 (3.30 million).

After years of moderate but steady declines or near-zero growth in the late nineties and early 2000s, manufacturing employment in the state experienced steep annual declines in 2002 (10.2 percent) and 2003 (7.0 percent) before returning to more moderate declines in 2004 (3.5 percent). After a steep decline of 9.5 percent in 2009, the decline returned to a less dramatic 2.2 percent in 2010, a slight uptick of 0.2 percent in 2011 and another drop of 1.8 percent in 2012. The preliminary seasonally adjusted estimates for March 2013 were lower than the estimates for the same period in 2012 (253.3 million compared to 250.1 million).

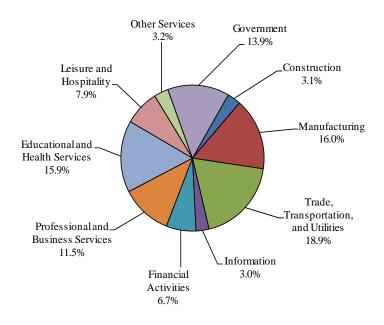

Massachusetts Non-Farm Payroll Employment (NAICS Industry basis)

NOTE: This alphabetic listing includes private employers reporting large numbers of jobs covered by the Massachusetts unemployment insurance program. The information is based on December 2011 employment for employers as registered for unemployment insurance. The list may not include those employers who do business in Massachusetts under multiple legal corporations and those who register each store, facility or franchisee as a separate employer.

Massachusetts Companies in the Fortune 500 List. The economic base of Massachusetts is anchored by the eleven 2012 Fortune 500 companies headquartered here. There were thirteen in 2011. When comparing the 2012 Fortune 500 to that of 2011, three Massachusetts companies gained, seven lost rank, and one remained the same. Global Partners, located in Waltham, climbed 124 places on the list, the largest leap for a Massachusetts company.

Unemployment Insurance Trust Fund. The unemployment insurance system is a federal-state cooperative program established by the Social Security Act and the Federal Unemployment Tax Act to provide for the payment of benefits to eligible individuals when they become unemployed through no fault of their own. Benefits are paid from the Commonwealth's Unemployment Insurance Trust Fund, financed through employer contributions. The assets and liabilities of the Commonwealth Unemployment Insurance Trust Fund are not assets and liabilities of the Commonwealth.

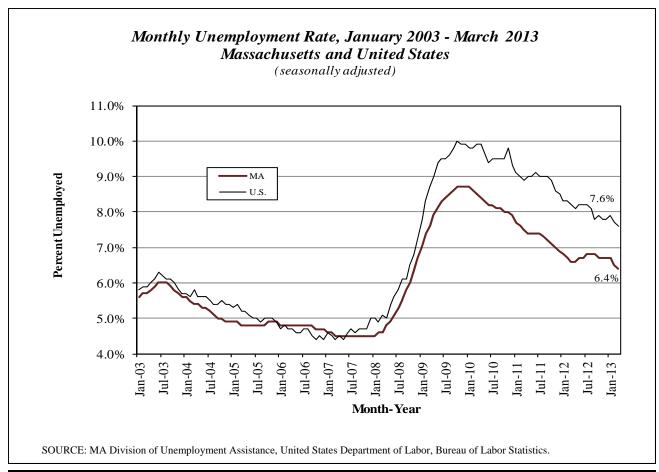

As of September 30, 2012, the Massachusetts Unemployment Trust Fund had a balance of \$496.7 million. This balance is the sum of the private contributory account balance of \$407.8 million and the government contributory account balance of \$88.9 million. This compares to an August 2012 balance of \$640 million with a private contributory portion of \$547 million. The October 2012 Unemployment Insurance Trust Fund report indicated that the private contributory account balance was estimated to be \$1.548 billion by the end of 2016 according to the Moody's-based outlook.

Unemployment. The unemployment rate in Massachusetts was consistently below the national average from mid-1995 through November 2005, with similar patterns of gradual improvement after the mid-2003 peak. The Massachusetts rate exceeded the U.S. rate for fourteen out of seventeen months between January 2006 and may 2007, but only three of those differences exceeded 0.2 percent. Since June 2007, the state rate has been at or below the comparable (seasonally adjusted) U.S. rate. In March 2007 the Massachusetts rate was 4.5 percent, the lowest it had been since October 2001. From October 2009 to June 2010 the rate peaked at 8.7 percent. The latest figure, the Massachusetts March 2013 seasonally adjusted rate was 6.4 percent, 1.2 percent below the national rate. The tables and graphs on the following two pages compare the unemployment rate in the state with those in New England and the U.S.

EDUCATION AND TECHNOLOGY

Educational Attainment. The availability of a skilled and well-educated population is an important resource for the Commonwealth. Only the District of Columbia had a higher percentage of adults with a bachelor's degree or higher in 2011, according to the Census Bureau's American Community Survey (ACS). The ACS also found that Massachusetts had a smaller proportion of persons who had not completed high school, 10.8 percent, than the national average of 14.1. Massachusetts' black and Hispanic populations achieved college degrees at roughly half the rate of its white population but their rates were higher than their national averages. The most current Census data are shown below.

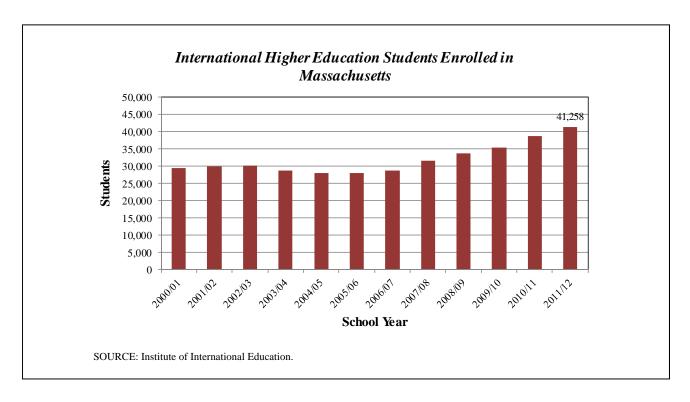

SOURCE: U.S. Census Bureau, ACS Estimates.

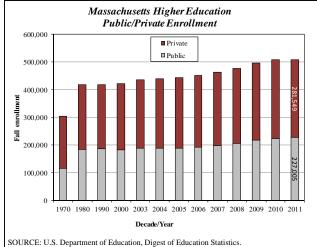

Higher Education Data. Minorities residing in Massachusetts have a greater representation in higher education institutions than their overall percent of the 18 and older population. The table below compares higher education enrollment by race and Hispanic origin to the general 18 and older population in the state and the U.S.

Higher Education Enrollment by Race and Hispanic Origin in 2011							
			White alone	Black alone	Asian alone	Other race	Hispanic or Latino

SOURCE: U.S. Census Bureau, American Community Survey estimates.

Survey data released by the Institute of International Education state that 41,258 foreign students were enrolled in Massachusetts colleges and universities in the 2011/2012 school year. This was an increase of 6.6 percent from the previous year. The national enrollment increased 6.5 percent. Massachusetts remains fourth ranked among states for foreign student enrollment.

Internet Access. A larger portion of the state's population has access to the internet compared to the nation as a whole, according to the latest Census survey taken in 2010. Massachusetts ranked fourth among states and the District of Columbia when comparing the percent (83.4) of individuals who had access to the internet in their household.

Patents. The U.S. Patent and Trademark Office notes: "This report shows the number of U.S. patent documents (i.e., utility patents, design patents, plant patents, reissue patents, defensive publications, and statutory invention registrations) granted since 1977, broken down by the state or country of origin (patent origin is determined by the residence of the first-named inventor)."

In 2010, Massachusetts was fifth among all states for the number of new patents issued. Only five nations originated more U.S. patents than Massachusetts, putting the state on par with the United Kingdom, France, and Canada for origination of U.S. patents. Since 1977, Massachusetts has received more new patents than any other New England state. With 5,261 new patents in 2010, up over 30 percent from 2009, Massachusetts innovators were responsible for over twice as many patents as Connecticut, which originated 2,111 patents in 2010.

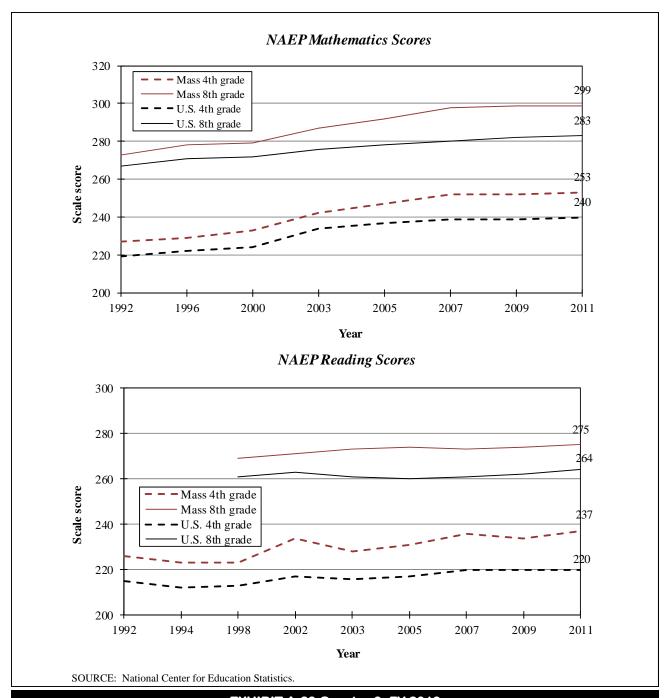

Primary and Secondary Education Expenditures. Massachusetts has spent from 12 to 35 percent more per pupil on primary and secondary education than the national average since 1981. During the 2009-2010 school year, Massachusetts increased per student expenditures 1.6 percent to \$14,350, which is eighth in the nation, much less than its average increase of 5.9 percent since 1981 and less than the 2.0 percent inflation rate from 2009 to 2010. While Massachusetts' spending is the smallest increase since 1981, it is still 135% of the national average. The table and chart below show expenditures per pupil for Massachusetts and the U.S. since fiscal 1981.

National Assessment of Educational Progress (NAEP) scores. The National Assessment of Educational Progress (NAEP), also known as "the Nation's Report Card," is the only nationally representative and continuing assessment of what America's students know and can do in various subject areas. Since 1969, assessments have been conducted periodically in reading, mathematics, science, writing, U.S. history, civics, geography, and the arts. Under the current structure, the Commissioner of Education Statistics, who heads the National Center for Education Statistics in the U.S. Department of Education, is responsible by law for administering the NAEP project.

Since 1990, NAEP assessments have also been conducted to give results for participating states. Those that choose to participate receive assessment results that report on the performance of students in that state. In its content, the state assessment is identical to the assessment conducted nationally. However, because the national NAEP samples were not, and are not currently designed to support the reporting of accurate and representative state-level results, separate representative samples of students are selected for each participating jurisdiction/state. The graphs below compare the data available for Massachusetts to the nation.

ECONOMIC BASE AND PERFORMANCE—STATE OVERVIEW

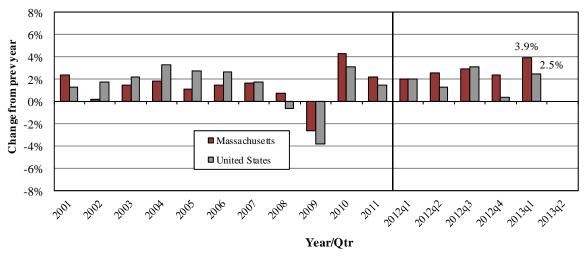

Comparing BEA GDP for the U.S., the region, and Massachusetts. The U.S. Bureau of Economic Analysis (BEA) defines Gross Domestic Product by State (GDP) as "the value added in production by the labor and property located in a state. GDP for a state is derived as the sum of the gross state product originating in all industries in a state. In concept, an industry's GDP, referred to as its "value added", is equivalent to its gross output (sales or receipts and other operating income, commodity taxes, and inventory change) minus its intermediate inputs (consumption of goods and services purchased from other U.S. industries or imported)."

The BEA provides national, quarterly, and annual state GDP estimates by industry. *Mass*Benchmarks releases quarterly estimates of Massachusetts economic activity. This is reported in the following section. While we do not have access to many of the components that BEA uses to calculate State GDP in advance of its release, we provide an overview of our state's components when they are available. Additionally, we provide state economic indexes and industrial sector data that are released more frequently and in some cases, are among the components used to calculate State GDP.

	State Gross Domestic Product - Annual Change (billions of chained 2005 dollars)

ECONOMIC BASE AND PERFORMANCE—ECONOMIC INDICATORS

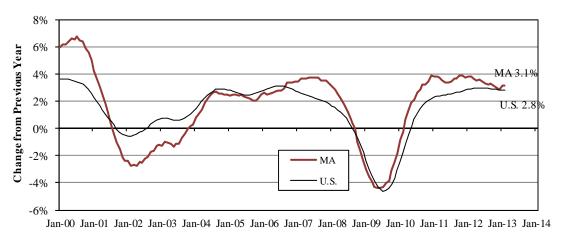

State Coincident Indexes. To track more recent changes in the state and national economies, we use the Federal Reserve Bank of Philadelphia's Coincident Indexes. It "produces a monthly coincident index for each of the 50 states. The indexes are released a few days after the Bureau of Labor Statistics (BLS) releases the employment data for the states.

The coincident indexes combine four state-level indicators to summarize current economic conditions in a single statistic. The four state-level variables in each coincident index are nonfarm payroll employment, average hours worked in manufacturing, the unemployment rate, and wage and salary disbursements deflated by the consumer price index (U.S. city average). The trend for each state's index is set to the trend of its gross domestic product (GDP), so long term growth in the state's index matches long term growth in its GDP."

The graph below indicates the state and national index change from 12 months prior. The Massachusetts monthly trend generally follows the nation's but it outperformed or matched the nation from May 2009 to February 2013. The bottom table compares the Massachusetts' index to its New England neighbors and the U.S.

Companing i	he U.S. and New	- Dugiana Sia	ies Co inciaen	iueni muexes	
Area	February 2013	1-Month Change	3-Month Change	12-Month Change	
U.S.	153.8	0.3%	0.7%	2.8%	
Massachusetts	179.0	0.4%	1.4%	3.1%	
Connecticut	155.8	0.3%	1.0%	2.1%	
Maine	133.3	0.3%	0.1%	0.0%	
New Hampshire	190.6	0.2%	0.6%	2.1%	
Rhode Island	150.9	0.9%	1.3%	2.4%	
Vermont	146.9	0.6%	1.3%	2.7%	

Comparing the U.S. and Massachusetts Coincident Indexes

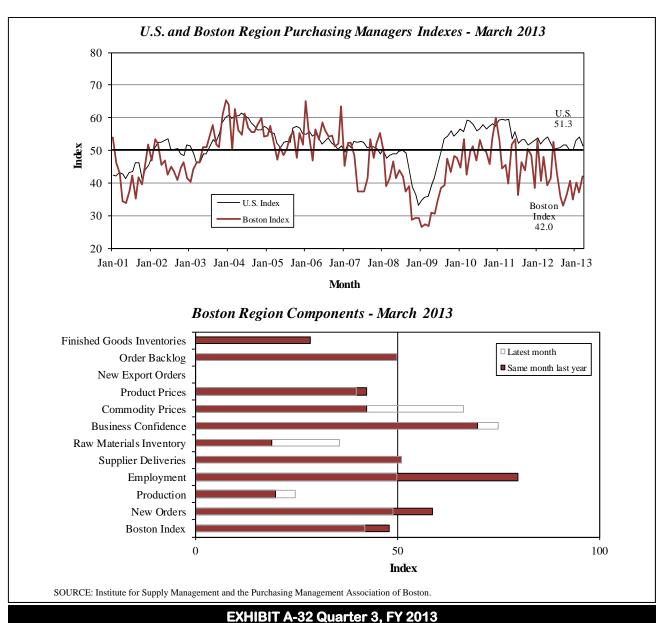

Month

SOURCE: Federal Reserve Bank of Philadelphia. Note: Indexes are set to 100 at July 1992.

Institute for Supply Management Purchasing Manager Indexes (PMI). These indexes are compiled using survey data from purchasing and supply executives and are used as a leading business indicator. While the national index is based on a survey of manufacturers, the Boston region's is based on a survey of "companies representing industries as diverse as the banking and financial services, pharmaceuticals and biotechnology, software development and communication, medical products and equipment, computers, chemicals, consumer products, education, and the public sector."

Index readings above 50 indicate the economy is generally expanding. Readings below 50 indicate the economy is generally contracting, although a reading above 42 for a period of time indicates the economy is generally expanding. Components of the national index include new orders, production, employment, supplier deliveries, inventories, customer inventories, prices, backlog of orders, exports and imports. The Boston region's components are slightly different and include new orders, production, employment, supplier deliveries, raw monthly materials inventory, business confidence, commodity prices, product prices, new export orders, order backlog and finished goods inventories. These components show which segments of the business supply chain are expanding or contracting.

The March 2013 national index indicated that the manufacturing sector has been expanding since May 2009. The Boston region's March 2013 index indicated that overall business conditions were contracting since July 2012. For the last five years the average business confidence, commodity prices, employment, new orders and the supplier deliveries indexes have been greater than 50. All other components have been less than 50.

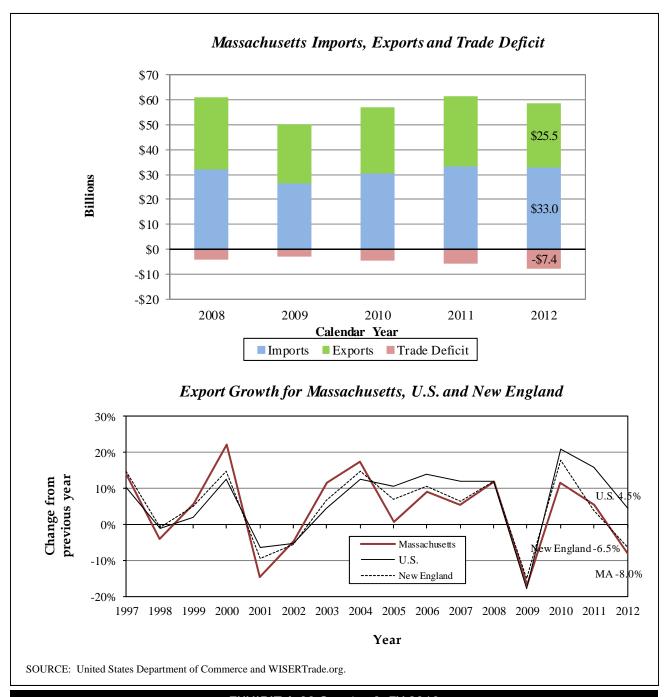

ECONOMIC BASE AND PERFORMANCE—INTERNATIONAL TRADE

Total Trade Volume. Total trade volume, exports and imports, decreased 4.2 percent from 2011 to \$58.2 billion in 2012. Canada trade volume was \$11.1 billion and 18.9 percent of the total state trade and was by far our most valuable trading partner. Our trade deficit, \$7.4 billion, grew 32.6 percent in 2012. See the appendix for more trade data.

Exports. Massachusetts ranked 18th in the United States in 2012 and first in New England with \$25.5 billion in exports. This was a 8.0 percent decrease from the previous year's export value from the Commonwealth while national exports increased by 4.5 percent. Total exports from New England also fell by 6.5 percent. Canada was our top export destination again with \$3.7 billion in 2012.

Imports. Imports fell to \$33.0 billion in 2012 after expanding 8.8 percent in 2011. Canada was also the largest source for Massachusetts imports in 2012 where we imported \$7.7 billion or 23.3 percent of our total.

ECONOMIC BASE AND PERFORMANCE—INDUSTRY SECTOR DETAIL (NAICS BASIS)

The Massachusetts economy remains diversified among several industrial and non-industrial sectors. The four largest sectors of the economy, manufacturing, real estate, rental and leasing, professional and technical services and finance and insurance, contributed 48.2 percent of the GDP in 2011. Manufacturing replaced the real estate, rental and leasing sector in 2011 as the largest. The following bar chart displays the latest sector contributions to the Massachusetts GDP.

SOURCE: United States Department of Commerce, Bureau of Economic Analysis. Green bar indicates positive change from previous year, red is a negative change.

*North American Industry Classification System.

GDP Subsectors. When measured in chained 2005 dollars, the change in Massachusetts total GDP was 13.1 percent between 2000 and 2010. Between 2000 and 2010 (the latest data available for subsector data), several industries grew much faster than the state average. Industry subsectors that experienced substantial cumulative growth or reduction are listed in the following chart.

NAICS* Industry Subsector	Percent change 2000-2010
Computer and electronic product manufacturing	371.5%
Information and data processing services	220.6%
Publishing industries, except Internet	73.2%
Computer systems design and related services	65.9%
Rental and leasing services and lessors of intangible assets	-10.4%
Fabricated metal product manufacturing	-12.1%
Insurance carriers and related activities	-15.6%
Machinery manufacturing	-18.7%

* North American Industry Classification System.

Industry Sector Analysis. The following section contains a summary for each of the twenty major NAICS sectors. The data series start in 2001, the last time the state experienced a downturn, commonly referred to as "The Telecom Bubble." We report the latest quarterly data at an annual rate where available. This may skew sectors that experience seasonal trends, such as construction. Graphs include data value labels for the latest annual and quarterly annualized points.

Not all datasets are reported for all of the major NAICS sectors. The Massachusetts Department of Workforce and Labor Development's Employment and Wages (ES-202) data series are available for every sector and contain the number of establishments, average monthly employment, total annual wages and average weekly wages for the establishments with employees. The data are reported annually and quarterly for employees in the private, federal government, state government, and local government sectors.

The next graph, nonemployer businesses and receipts, uses the U.S. Census Nonemployer Statistics series and is available for every sector except 55-Management of Companies and Enterprises and 92-Public Administration. Some sectors also lack subsector (we used four digit NAICS) detail. These are annual data, with a two-year reporting lag for businesses that do not have paid employees and are subject to federal income tax. Census reports that "Nonemployers account for a majority of all business establishments, but average less than four percent of all sales or receipts." These can be second or part-time businesses and not the owner's primary source of income.

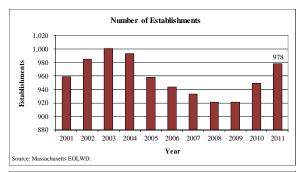

State Gross Domestic Product is an annual series from the U.S. Bureau of Economic Analysis's Regional Economic Accounts. U.S. and state GDP is inflation adjusted to 2005. U.S. GDP is available quarterly.

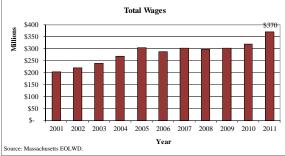

Foreign exports from the U.S. Census Bureau's Foreign Trade Division and WISERTrade, are available for four industries on a monthly basis. Total state exports are available on a monthly basis. Sector exports and the top ten export destinations for this industry sector are by dollar value.

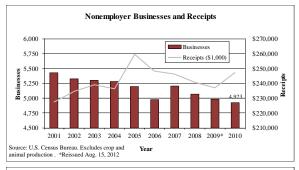

Each sector analysis has a summary at the bottom of each page. The summary provides (when available):

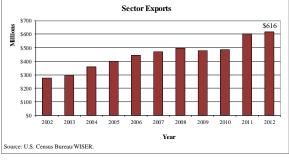

- 1. GDP contribution to state total: this sector's GDP divided by the state's total GDP.
- 2. GDP rank: this sector's GDP rank versus all state sectors.
- 3. Nonemployer to employer establishment ratio: the number of nonemployer establishments divided by the number of establishments with employers. In general, a ratio greater than one means there are more small businesses. A number less than one means there are more large business.
- 4. Establishments with employees: the subsector with the largest number of establishments who have employees.
- 5. Nonemployer establishments: the subsector with the largest number of establishments that do not have employees.
- 6. Employees: the subsector with the largest number of employees, at establishments with employees.
- 7. Annual wages: the subsector with the largest total annual wages, at establishments with employees.
- 8. Average weekly wage: the subsector with the largest average weekly wage, at establishments with employees.
- 9. Annual receipts at nonemployer establishments: the subsector with the most receipts, at establishments that do not have employees.
- 10. Most valuable export: the subsector export with the highest dollar value.
- 11. Large employers in Massachusetts: a few of the state's largest employers in this sector, from ReferenceUSA.com.

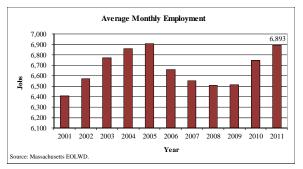

NAICS 11 - Agriculture, Forestry, Fishing & Hunting. The Agriculture, Forestry, Fishing and Hunting sector comprises establishments primarily engaged in growing crops, raising animals, harvesting timber, and harvesting fish and other animals from a farm, ranch, or their natural habitats.

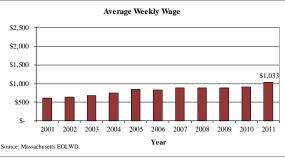

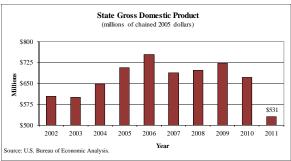

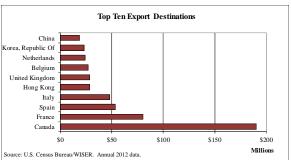

Summary.

GDP contribution to state total: 0.18%

GDP rank: 19 of 20

Nonemployer to employer establishment ratio: 5.2 to 1

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Fishing** Nonemployer establishments: **Fishing**

 ${\bf Employees:} \textbf{Fishing and greenhouse and nursery production}$

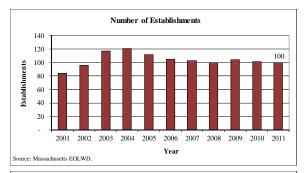

Annual wages: **Fishing**Average weekly wage: **Fishing**

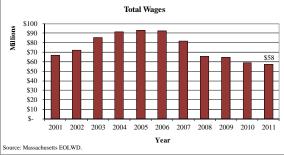

Annual receipts at nonemployer establishments: Fishing

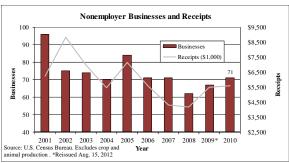

Most valuable export: Fish, fresh, chilled or other frozen marine products

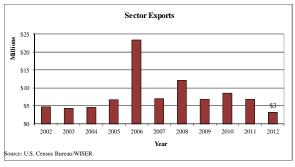

Large employers in Massachusetts: Idlywilde Farm, Brown and Regan LLC, Bartlett's Ocean View Farm

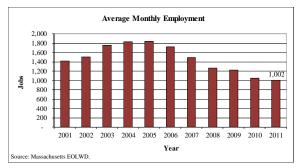

NAICS 21 – Mining. The Mining, Quarrying, and Oil and Gas Extraction sector comprises establishments that extract naturally occurring mineral solids, such as coal and ores; liquid minerals, such as crude petroleum; and gases, such as natural gas. The term mining is used in the broad sense to include quarrying, well operations, beneficiating (e.g., crushing, screening, washing, and flotation), and other preparation customarily performed at the mine site, or as a part of mining activity.

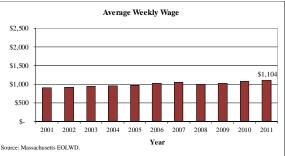

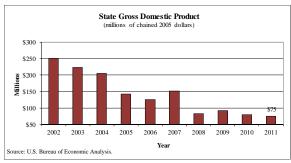

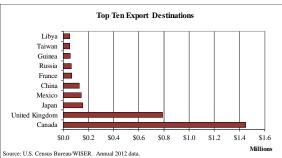

Summary.

GDP contribution to state total: 0.03%

GDP rank: 20 of 20

Nonemployer to employer establishment ratio: 0.7 to 1

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: Nonmetallic mineral mining and quarrying

Nonemployer establishments: Nonmetallic mineral mining and quarrying

 ${\bf Employees: Nonmetallic\ mineral\ mining\ and\ quarrying}$

Annual wages: Nonmetallic mineral mining and quarrying

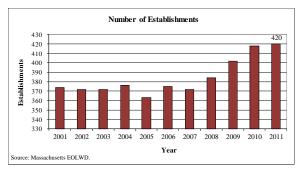

Average weekly wage: Support activities for mining

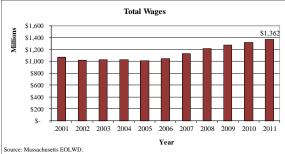

Annual receipts at nonemployer establishments: Nonmetallic mineral mining and quarrying

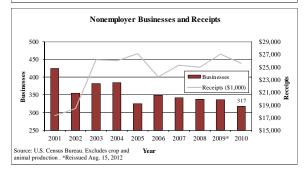

Most valuable export: Minerals and ores

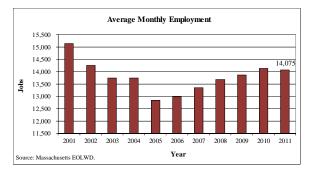

Large employers in Massachusetts: S. M. Larusso and Sons Inc., Hyannis Sand and Gravel Inc.

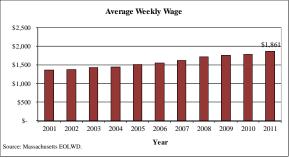

NAICS 22 – **Utilities.** The Utilities sector comprises establishments engaged in the provision of the following utility services: electric power, natural gas, steam supply, water supply, and sewage removal. See the appendix, pages five and six for supplemental tables regarding electricity generation, supply and capacity.

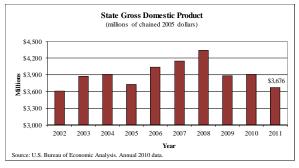

Summary.

GDP contribution to state total: 1.22%

GDP rank: 17 of 20

Nonemployer to employer establishment ratio: 0.8 to 1

 $\textbf{Sector leaders.} \ \textbf{Industry subsectors with the majority of establishments, employees, payroll and receipts.}$

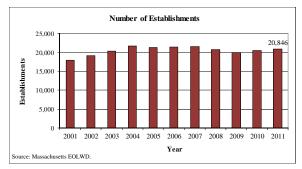

Establishments with employees: Water, sewage and other systems

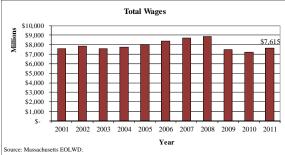

Nonemployer establishments: Subsector detail N/A Employees: **Power generation and supply** Annual wages: **Power generation and supply** Average weekly wage: **Power generation and supply**

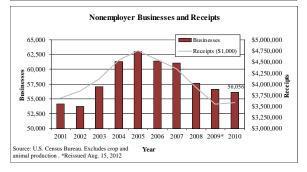

Annual receipts at nonemployer establishments: Subsector detail N/A

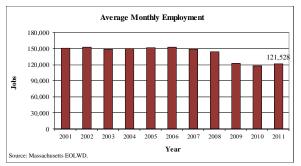

Large employers in Massachusetts: Columbia Gas of Massachusetts, Pilgrim Nuclear Power Station, Boston Water Commission.

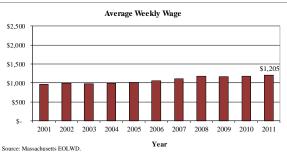

NAICS 23 – Construction. The Construction sector comprises establishments primarily engaged in the construction of buildings or engineering projects (e.g., highways and utility systems). Establishments primarily engaged in the preparation of sites for new construction and establishments primarily engaged in subdividing land for sale as building sites also are included in this sector. See the appendix pages two through four for housing permits, housing sales, and housing sale prices.

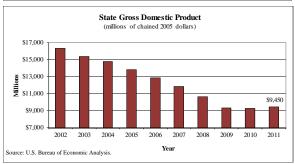

Summary.

GDP contribution to state total: 2.85%

GDP rank: 12 of 20

Nonemployer to employer establishment ratio: 2.7 to 1

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

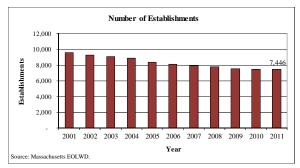

Establishments with employees: **Specialty Trade Contractors**Nonemployer establishments: **Building finishing contractors**

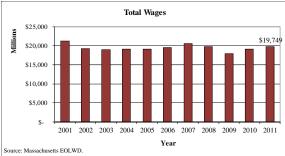

Employees: Building equipment contractors
Annual wages: Building equipment contractors
Average weekly wage: Utility system construction

 $Annual\ receipts\ at\ nonemployer\ establishments: \textbf{Residential\ building\ construction}$

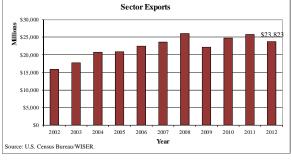

Large employers in Massachusetts: Suffolk Construction Company, J&S Electric Company, R.H. White Company and Interstate Electrical Services Group.

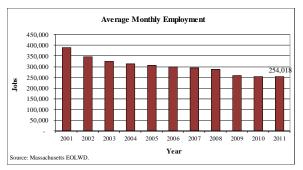

NAICS 31-33 – **Manufacturing.** The Manufacturing sector comprises establishments engaged in the mechanical, physical, or chemical transformation of materials, substances, or components into new products. The assembling of component parts of manufactured products is considered manufacturing, except in cases where the activity is appropriately classified in Sector 23, Construction.

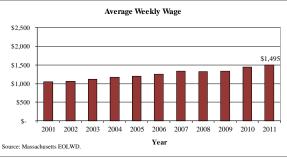

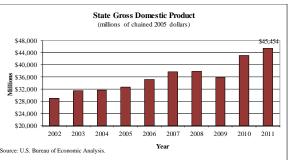

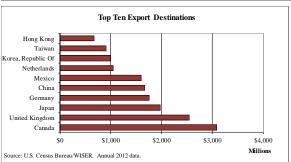

Summary.

GDP contribution to state total: 11.4%

GDP rank: 3 of 20

Nonemployer to employer establishment ratio: $0.8\ to\ 1$

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: Printing and related support activities

Nonemployer establishments: Other miscellaneous manufacturing

Employees: Electronic instrument

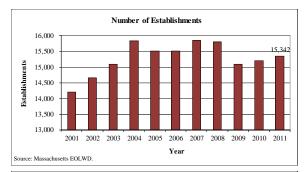

Annual wages: Electronic instrument

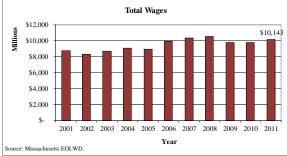

Average weekly wage: Computers and peripheral equipment

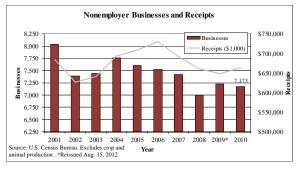

Annual receipts at nonemployer establishments: **Agricultural chemical mfg.** Most valuable export: **Computers and electronic products and chemicals**

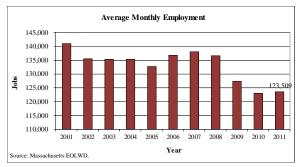

Large employers in Massachusetts: Boston Scientific, GE, Genzyme, Gillette, Kronos, Raytheon, Saint-Gobain, Textron, Waters.

NAICS 42 - Wholesale Trade. The sector comprises establishments engaged in wholesaling merchandise, generally without transformation, and rendering services incidental to the sale of merchandise. The merchandise described in this sector includes the outputs of agriculture, mining, manufacturing, and certain information industries, such as publishing. The wholesaling process is an intermediate step in the distribution of merchandise.

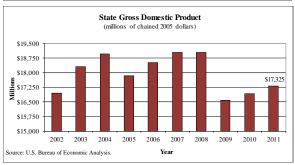

Summary.

GDP contribution to state total: 5.17%

GDP rank: 7 of 20

Nonemployer to employer establishment ratio: 0.5 to 1

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: Electronic markets and agents/brokers

Nonemployer establishments: Miscellaneous durable goods merchant wholesalers

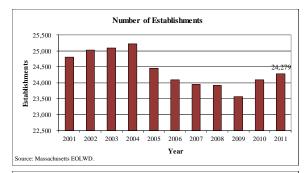

Employees: Electronic markets and agents/brokers
Annual wages: Electronic markets and agents/brokers

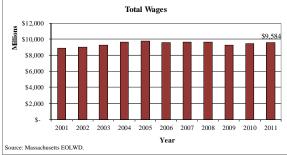

Average weekly wage: Druggists' goods merchant wholesalers

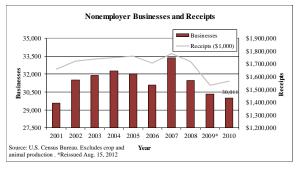

Annual receipts at nonemployer establishments: Miscellaneous durable goods merchant wholesalers

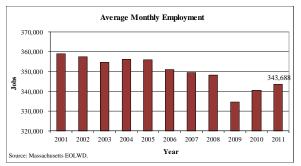

Large employers in Massachusetts: C&S Wholesalers, Pfizer, Philips Healthcare, Teradyne, Vertex Pharmaceuticals.

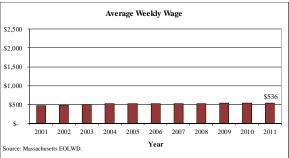

NAICS 44-45 - Retail Trade. The Retail Trade sector comprises establishments engaged in retailing merchandise, generally without transformation, and rendering services incidental to the sale of merchandise. The retailing process is the final step in the distribution of merchandise; retailers are therefore organized to sell merchandise in small quantities to the general public. This sector comprises two main types of retailers: store and nonstore retailers.

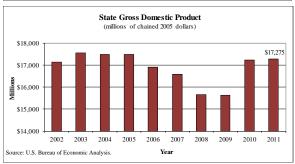

Summary.

GDP contribution to state total: 4.56%

GDP rank: 9 of 20

Nonemployer to employer establishment ratio: 1.2 to 1

 $\textbf{Sector leaders.} \ \textbf{Industry subsectors with the majority of establishments, employees, payroll and receipts.}$

Establishments with employees: Grocery stores

Nonemployer establishments: Direct selling establishments

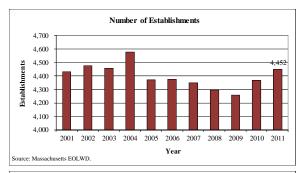

Employees: **Grocery stores**Annual wages: **Grocery stores**

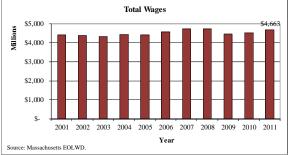

Average weekly wage: Automobile dealers

 $Annual\ receipts\ at\ nonemployer\ establishments: \textbf{Direct\ selling\ establishments}$

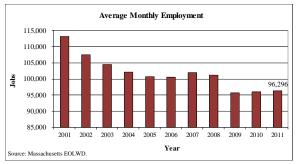

Large employers in Massachusetts: ARAMARK, B Mango & Bird, Bose, Foodmaster, Marmaxx Group, Sleepy's, Staples, Stop & Shop, Talbots, TJX, Yankee Candle.

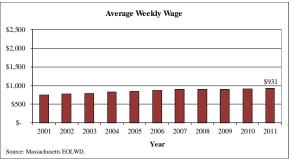

NAICS 48-49 - Transportation and Warehousing. The Transportation and Warehousing sector includes industries providing transportation of passengers and cargo, warehousing and storage for goods, scenic and sightseeing transportation, and support activities related to modes of transportation. Establishments in these industries use transportation equipment or transportation related facilities as a productive asset. The type of equipment depends on the mode of transportation. The modes of transportation are air, rail, water, road, and pipeline. See pages six and seven of the appendix for more information regarding transportation and warehousing.

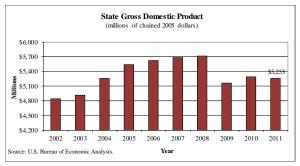

Summary.

GDP contribution to state total:1.55%

GDP rank:16 of 20

Nonemployer to employer establishment ratio: 3.7 to 1

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: General freight trucking Nonemployer establishments: Taxi and limousine service

Employees: Couriers

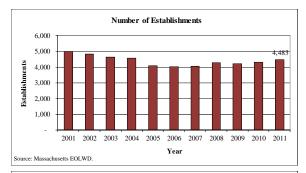

Annual wages: General freight trucking

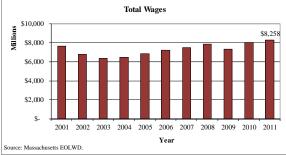

Average weekly wage: Pipeline transportation of natural gas

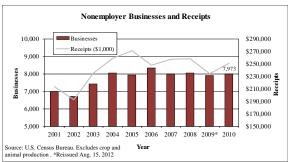

Annual receipts at nonemployer establishments: General freight trucking

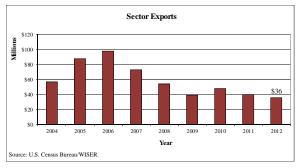

Large employers in Massachusetts: Maine Central Railroad, United Vision Logistics, U.S. Post Office.

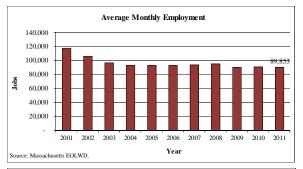

NAICS 51 – Information. The Information sector comprises establishments engaged in the following processes: producing and distributing information and cultural products, providing the means to transmit or distribute these products as well as data or communications, and processing data.

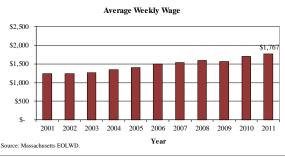

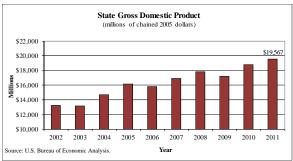

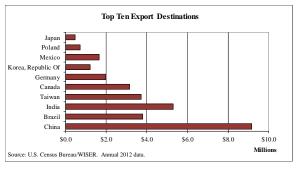

Summary.

GDP contribution to state total: 4.89%

GDP rank: 8 of 20

Nonemployer to employer establishment ratio: 1.9 to 1

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: Newspaper, book, & directory publishers

Nonemployer establishments: Other information services

Employees: Software publishers

Annual wages: Software publishers

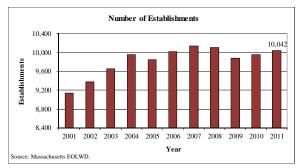

Average weekly wage: Software publishers

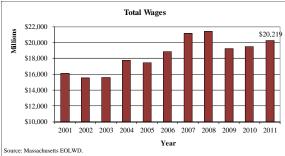

Annual receipts at nonemployer establishments: Other information services

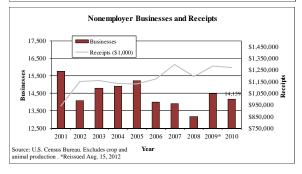

Most valuable export: Prepackaged software

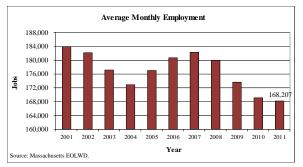

Large employers in Massachusetts: Globe, Houghton Mifflin Harcourt, Pearson Education, Thompson Research, Super Media, WGBH.

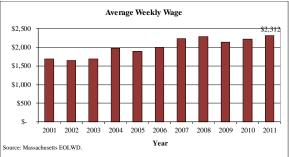

NAICS 52 - Finance and Insurance. The Finance and Insurance sector comprises establishments primarily engaged in financial transactions (transactions involving the creation, liquidation, or change in ownership of financial assets) and/or in facilitating financial transactions.

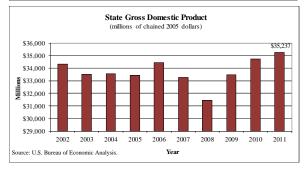

Summary.

GDP contribution to state total: 9.88%

GDP rank: 5 of 20

Nonemployer to employer establishment ratio: 1.4 to 1

 $\textbf{Sector leaders.} \ \textbf{Industry subsectors with the majority of establishments, employees, payroll and receipts.}$

Establishments with employees: Insurance agencies, brokerages & support

Nonemployer establishments: Agencies, brokerages, and other insurance related activities

 ${\bf Employees:}\ {\bf Depository}\ {\bf credit}\ {\bf intermediation}$

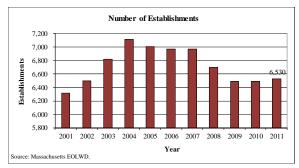

Annual wages: Other financial investment activities

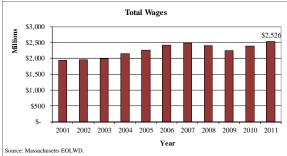

Average weekly wage: Other investment pools and funds

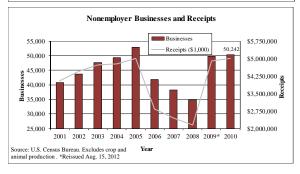

Annual receipts at nonemployer establishments: Other financial investment activities

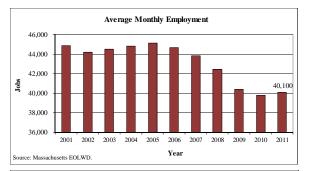

Large employers in Massachusetts: John Hancock, Liberty Mutual.

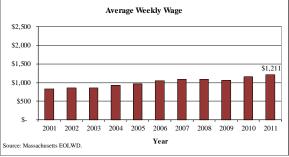

NAICS 53 - Real Estate and Rental and Leasing. The Real Estate and Rental and Leasing sector comprises establishments primarily engaged in renting, leasing, or otherwise allowing the use of tangible or intangible assets, and establishments providing related services. The major portion of this sector comprises establishments that rent, lease, or otherwise allow the use of their own assets by others. The assets may be tangible, as is the case of real estate and equipment, or intangible, as is the case with patents and trademarks.

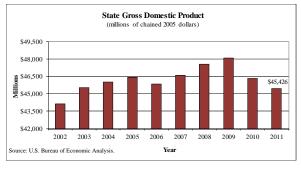

Summary.

GDP contribution to state total: 12.79%

GDP rank: 1 of 20

Nonemployer to employer establishment ratio: 7.7 to 1

 $\textbf{Sector leaders.} \ \textbf{Industry subsectors with the majority of establishments, employees, payroll and receipts.}$

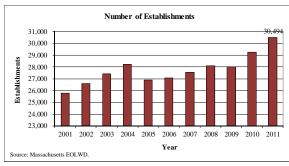

Establishments with employees: Offices of real estate agents & brokers Nonemployer establishments: Offices of real estate agents and brokers

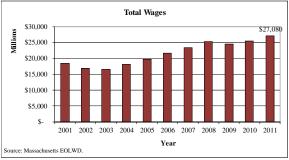

Employees: Activities related to real estate Annual wages: Activities related to real estate

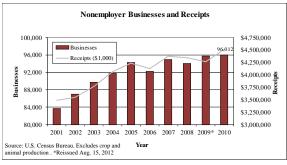

Average weekly wage: Lessors, nonfinancial intangible assets Annual receipts at nonemployer establishments: Lessors of real estate

Large employers in Massachusetts: Boston Housing Authority, REIT Management and Research, Milton Medical Office Building

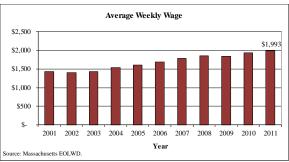

NAICS 54 - Professional and Technical Services. The Professional and Technical Services sector comprises establishments that specialize in performing professional, scientific, and technical activities for others. These activities require a high degree of expertise and training. The establishments in this sector specialize according to expertise and provide these services to clients in a variety of industries - in some cases, to households. Activities performed include: legal advice and representation, accounting, bookkeeping, and payroll services, architectural, engineering, and specialized design services, computer services, consulting services, research services, advertising services, photographic services, translation and interpretation services, veterinary services, and other professional, scientific, and technical services.

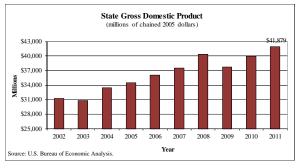

Summary.

GDP contribution to state total: 12.20%

GDP rank: 2 of 20

Nonemployer to employer establishment ratio: 3.3 to 1

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: Computer systems design and related services

Nonemployer establishments: Other professional, scientific, and technical services

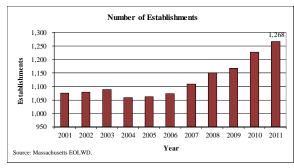

Employees: Computer systems design and related services Annual wages: Computer systems design and related services

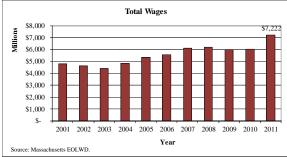

Average weekly wage: Computer systems design and related services

Annual receipts at nonemployer establishments: Management, scientific, and technical consulting services

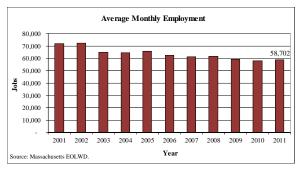

Large employers in Massachusetts: Research Lab Electronics at Massachusetts Institute of Technology, EMC Corp.

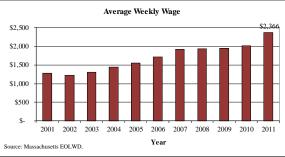

NAICS 55 - Management of Companies and Enterprises. The Management of Companies and Enterprises sector comprises establishments that hold the securities of (or other equity interests in) companies and enterprises for the purpose of owning a controlling interest or influencing management decisions or establishments (except government establishments) that administer, oversee, and manage establishments of the company or enterprise and that normally undertake the strategic or organizational planning and decision making role of the company or enterprise. Establishments that administer, oversee, and manage may hold the securities of the company or enterprise.

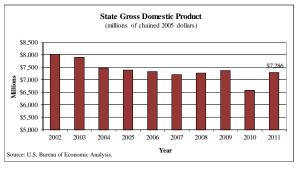

State nonemployer and export data are not available for this sector.

Summary.

GDP contribution to state total: 2.49%

GDP rank: 14 of 20

Nonemployer to employer establishment ratio: N/A

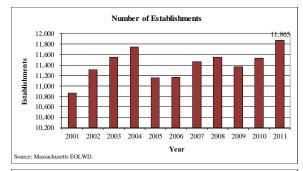

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll, and receipts.

NAICS 62 - Health Care and Social Assistance. The Health Care and Social Assistance sector comprises establishments providing health care and social assistance for individuals. The sector includes both health care and social assistance because it is sometimes difficult to distinguish between the boundaries of these two activities.

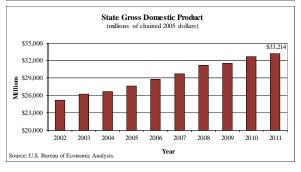

Summary.

GDP contribution to state total: 9.95%

GDP rank: 4 of 20

Nonemployer to employer establishment ratio: 2.5 to 1

 $\textbf{Sector leaders.} \ \textbf{Industry subsectors with the majority of establishments, employees, payroll and receipts.}$

Establishments with employees: Offices of physicians

Nonemployer establishments: Offices of other health practitioners

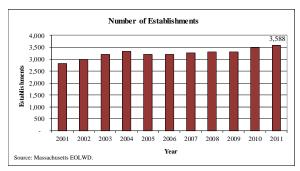

Employees: General medical and surgical hospitals Annual wages: General medical and surgical hospitals

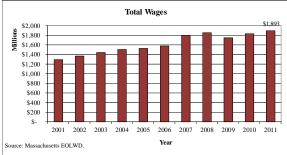

Average weekly wage: Offices of physicians

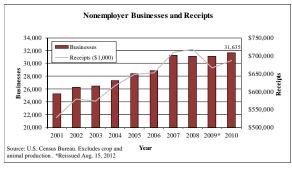

Annual receipts at nonemployer establishments: Offices of other health practitioners

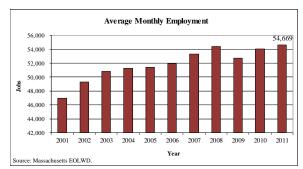

Large employers in Massachusetts: Massachusetts General Hospital and Brigham and Women's Hospital

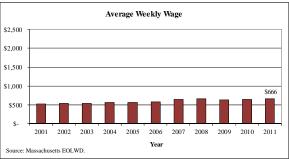

NAICS 71 - Arts, Entertainment, and Recreation. The Arts, Entertainment, and Recreation sector includes a wide range of establishments that: operate facilities or provide services to meet varied cultural, entertainment, and recreational interests of their patrons, are involved in producing, promoting, or participating in live performances, events, or exhibits intended for public viewing, preserve and exhibit objects and sites of historical, cultural, or educational interest and operate facilities or provide services that enable patrons to participate in recreational activities or pursue amusement, hobby, and leisure-time interests. See the Appendix page six for travel and tourism information.

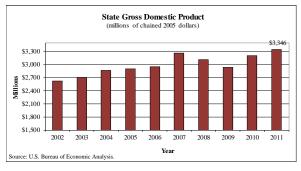

State export data are not available for this sector.

Summary.

GDP contribution to state total: 0.96%

GDP rank: 18 of 20

Nonemployer to employer establishment ratio: 9.1 to 1

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Other amusement & recreation industries** Nonemployer establishments: **Independent artists, writers, and performers**

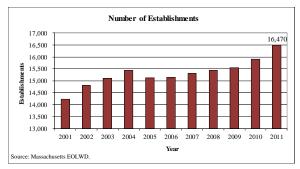

Employees: Other amusement & recreation industries
Annual wages: Other amusement & recreation industries

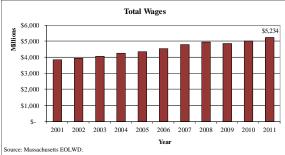

Average weekly wage: Spectator sports

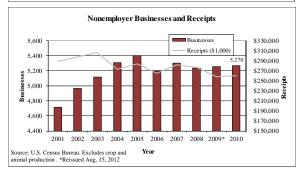

Annual receipts at nonemployer establishments: Independent artists, writers, and performers

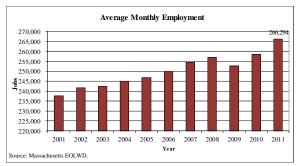

Large employers in Massachusetts: Museum of Fine Arts, Suffolk Downs, Raynham Park, Peabody Essex Museum, Comcast Center

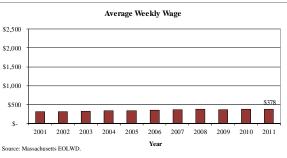

NAICS 72 - Accommodation and Food Services. The Accommodation and Food Services sector comprises establishments providing customers with lodging and/or preparing meals, snacks, and beverages for immediate consumption. The sector includes both accommodation and food services establishments because the two activities are often combined at the same establishment.

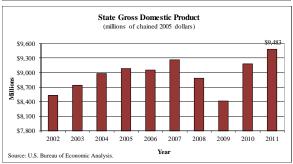

Summary.

GDP contribution to state total: 2.88%

GDP rank: 11 of 20

Nonemployer to employer establishment ratio: 0.3 to 1

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: Limited-service eating places

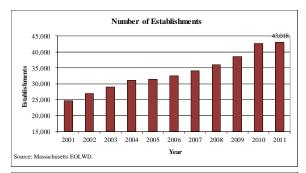

Nonemployer establishments: Special food services

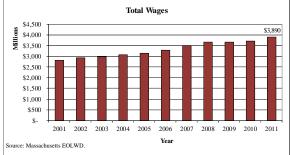

Employees: Full-service restaurants
Annual wages: Full-service restaurants
Average weekly wage: Traveler accommodation

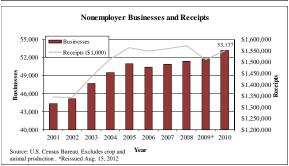

Annual receipts at nonemployer establishments: Limited-service eating places

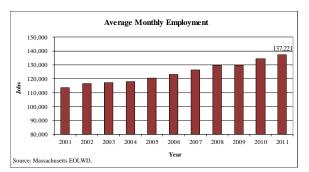

Large employers in Massachusetts: Wachusett Mountain, Hawthorne Motel, Westin Copley Place, Sheraton Boston.

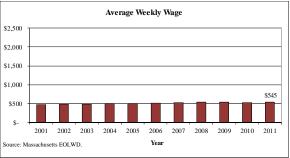

NAICS 81 - Other Services, Except Public Administration. The Other Services (except Public Administration) sector comprises establishments engaged in providing services not specifically provided for elsewhere in the classification system. Establishments in this sector are primarily engaged in activities such as equipment and machinery repairing, promoting or administering religious activities, grant making, advocacy, providing dry cleaning and laundry services, personal care services, death care services, pet care services, photofinishing services, temporary parking services, and dating services.

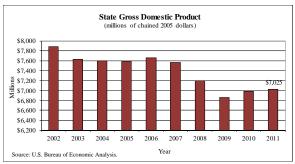

Summary.

GDP contribution to state total: 2.24%

GDP rank: 15 of 20

Nonemployer to employer establishment ratio: 1.2 to 1

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: **Private households**Nonemployer establishments: **Other personal services**

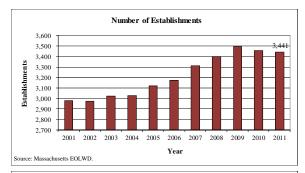

Employees: Private households

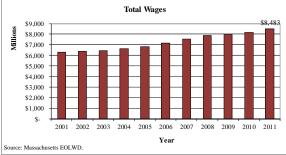

Annual wages: Automotive repair and maintenance

Average weekly wage: **Electronic equipment repair/maintenance** Annual receipts at nonemployer establishments: **Other personal services**

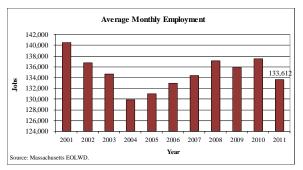

Large employers in Massachusetts: MITRECorp, VNA Care Network, Christian Science Publishing.

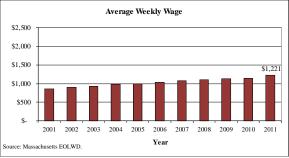

NAICS 92 - Public Administration. The Public Administration sector consists of establishments of federal, state, and local government agencies that administer, oversee, and manage public programs and have executive, legislative, or judicial authority over other institutions within a given area. These agencies also set policy, create laws, adjudicate civil and criminal legal cases and provide for public safety and national defense.

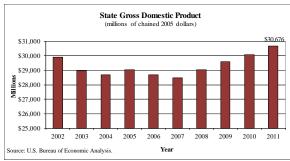

State nonemployer and export data are not available for this sector.

Summary.

GDP contribution to state total: 9.47%

GDP rank: 6 of 20

Nonemployer to employer establishment ratio: N/A

Sector leaders. Industry subsectors with the majority of establishments, employees, payroll and receipts.

Establishments with employees: Executive, legislative, & general government

Nonemployer establishments: N/A

Employees: Justice, public order, and safety activities
Annual wages: Justice, public order, and safety activities
Average weekly wage: National security & international affairs

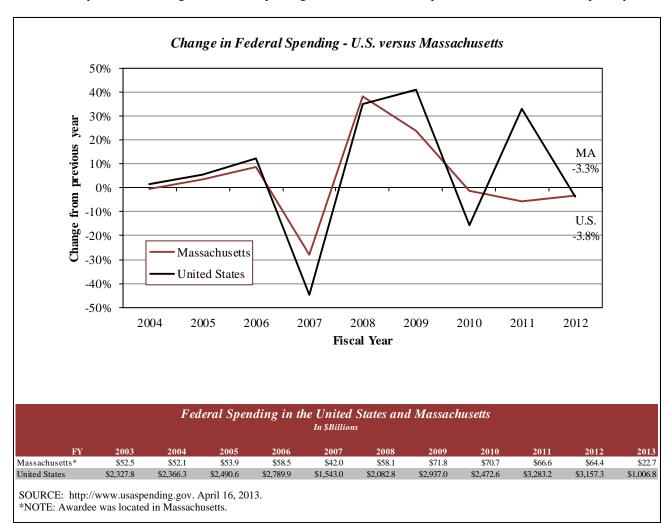

Annual receipts at nonemployer establishments: N/A

Large employers in Massachusetts: Massachusetts Water Resource Authority, Massachusetts Department of Mental Retardation, Massachusetts Department of Transitional Assistance.

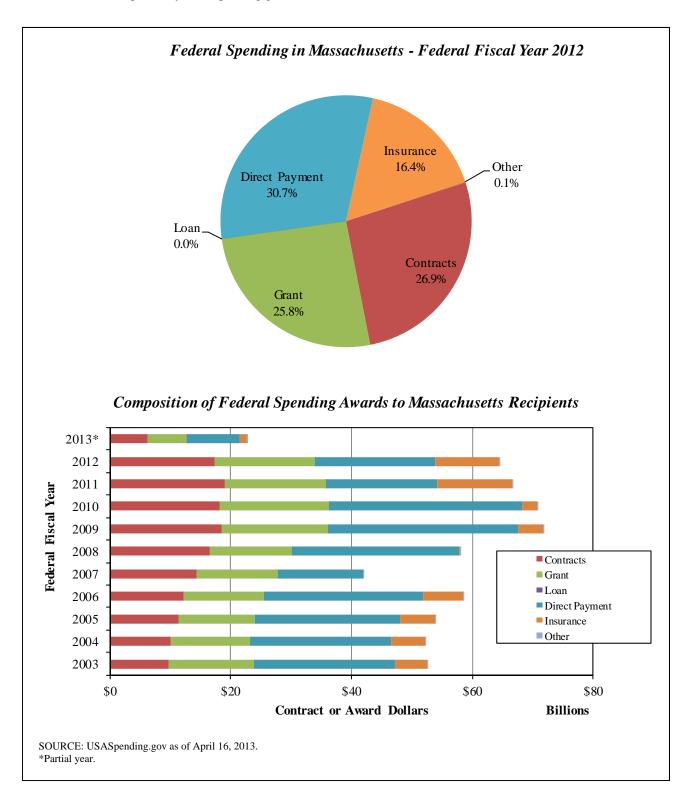

ECONOMIC BASE AND PERFORMANCE—GOVERNMENT REVENUES AND SPENDING

Federal Spending in Massachusetts. Massachusetts received approximately \$64.4 billion in contracts, grants, direct payments, insurance, loans and guarantees, and other spending from the federal government in federal FY2012, the last complete year of federal spending data. On average over the last eleven years, Massachusetts received 2.3 percent of the federal government's prime award dollars. In FY 2012 it was 2.0 percent and \$8.11 billion less than its 2.3 percent average.

Note: Due to budget cuts, the U.S. Census Bureau has discontinued the CFFR data series, the previous source for these data. FY 2010 will be the last year reported. The Massachusetts SDC will replace this series with data from USASpending.gov, its source for federal contract data. Historical data from USASpending does not include spending by all federal agencies (81 percent of FY 2010 CFFR total spending) as some agencies were not required to report via that database. USASpending will eventually add all federal agencies to their spending database to meet the requirements of the federal Transparency Act.

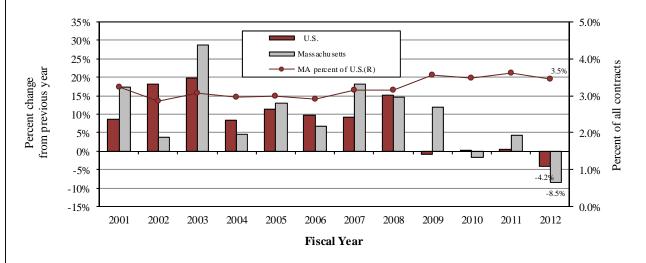

In federal fiscal year 2012, the majority of federal government spending in Massachusetts was for contracted goods and services. Over the past ten years, 2003-2012, the majority (47.1 percent) of federal spending in Massachusetts has been for direct payments such as Social Security, Unemployment Insurance, Housing Choice Vouchers and Federal Pell Grants. The graphs below describe the most recent complete fiscal year and the last ten years of federal spending in Massachusetts as reported by USASpending.gov.

Federal Contracts. The total dollar value of all federal contracts received by Massachusetts contractors increased an average of 16.4 percent per year from 2000 to 2012, 2.8 percent faster then the 13.6 percent U.S. average. The following two pages compare Massachusetts federal contract dollars received and work primarily performed in Massachusetts to the U.S. total and summarize the fiscal year periods from 2000 to 2012 as of April 17, 2013.

(millions of dollars)

SOURCE: http://www.usaspending.gov. Federal Fiscal Year Oct 1-Sept 30.

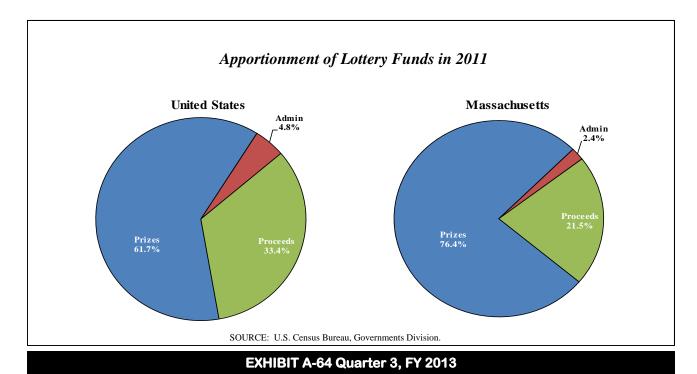

NOTE: Reported as of April 17, 2013.

State Revenues. Taxes collected by all states in FY 2011 totaled \$763.7 billion, 8.4 percent more than FY 2010. Massachusetts collected \$22.1 billion in FY 2011, 10.2 percent more than it did in FY 2010. Massachusetts' revenues grew more than any other New England state. Massachusetts ranked 11th in total taxes collected in 2011, no change from 2010 or 2009.

In fiscal year 2011, Massachusetts collected 52.5 percent of its revenue from individual income tax. Overall, states received 33.9 percent of all revenues from individual income taxes and seven states did not have the tax in 2011. In FY 2011, the state collected 14.5 percent more individual income taxes than it did in FY 2010.

State Lottery Proceeds. Massachusetts ranked second in revenue, \$4.17 billion, and prize money awarded, \$3.2 billion, among the 42 states with lotteries in FY 2011.

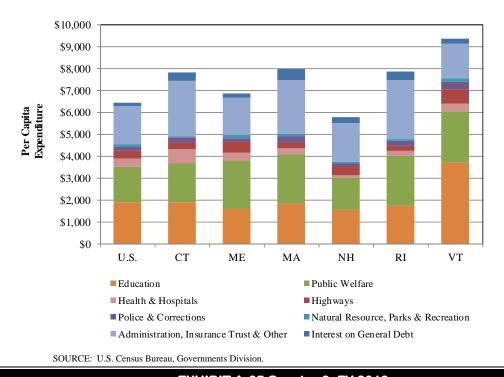

State Expenditures. The following table and graph depict fiscal 2011 per capita state general expenditures by category for the six New England states and the U.S. average state expenditure. Massachusetts ranked 9th in the nation in per capita expenditures, \$7,954 in 2011, while it ranked 8th and spent \$7,901 in 2010. This represents a 0.7 percent increase in per capita expenditures from 2010 to 2011 with the largest per capita dollar increase in the Public Welfare function.

Electricity Prices, Supply and Capacity by Source. Massachusetts had the seventh highest electric rate in the country in 2010, 14.26 cents per kilowatt hour, while the U.S. average was 9.83. This was a decrease of 7.7 percent for Massachusetts and an increase of 0.1 percent for the U.S. from the previous year. Massachusetts electric utilities generated \$8.1 billion in revenue in 2010. This was 3.0 percent less than in 2009, while they sold 5.1 percent more electricity. Massachusetts's latest reported average combined electric rate, year-to-date July 2012, is virtually unchanged at 14.12 cents per kilowatt hour compared to the same period last year. The Massachusetts Net Electricity Trade Index, which represents the state's electricity self-sufficiency, was 0.77 in 2010. This means that Massachusetts imported 23 percent of its electricity supply, 14,030 million kilowatt hours, from out-of-state. In 2010, two-thirds of Massachusetts generating capacity was oil and natural gas based.

Travel and Tourism. The Massachusetts Office of Travel and Tourism (MOTT) reported a 0.17% percent increase in museum and attraction attendance, 11.3 million visitors, through November 2012, compared to the same eleven months in 2011. For FY2013 September year-to-date net room occupancy tax collections totaled \$83.4 million, a 7.1% increase from the same period in FY2012.

Transportation and Warehousing. Massachusetts' major air and seaports are managed by the Massachusetts Port Authority (Massport), an independent public authority. Based on total passenger volume in calendar year 2011 data, Logan Airport was the most active airport in New England, remaining the 19th most active in the U.S. according to the Federal Aviation Authority. Massport reported that as of December 2012 year-to-date, total airport flight operations were down 3.8 percent and total airport passengers were up 1.4 percent from the same period in 2011. According to the FAA, in calendar year 2011, Logan Airport ranked 29th in the nation in total air cargo volume. In 2011, the airport handled 530 million pounds of cargo; a 3.1 percent decrease from 2010. Massport reported that as of December 2012 year-to-date, the combined cargo volume was down 0.8 percent and total express mail was down 1.7 percent from the same period in 2011. Please refer to the Aviation Activity charts on the following page.

At Massport's Port of Boston properties, total containerized cargo processed fell 2.6 percent in 2012 to 187,747 TEUs compared to calendar year 2011. It processed 41,120 automobiles, 10.4 percent more, and 380,054 cruise passengers, 22.5 percent more, than in calendar year 2011.

The Army Corps of Engineers reported Massachusetts total waterborne cargo shipped or received in 2011 decreased by 32.0 percent to 15.4 million short tons from 2010. Waterborne cargo in New England decreased 14.5 percent while the U.S. increased 1.4 percent. Please refer to the Waterborne Tonnage by State charts on the following page.
